University of Florida
January 23rd - 24th, 2016

350 – 400 students **January 23rd 12pm – January 24th 12pm**
Marston Science Library

SwampHacks is the University of Florida's official student hackathon,

going into its second year. Last year we saw 130 students representing 7 schools from around the country put forth 30 amazing software products as a result of 18 hours of caffeine-driven productivity. Check out some of our [photos from the event](#) and look at our [submissions](#).

This year, we're going bigger.

SwampHacks 2016 will be a [major league hackathon](#). Taking place during a 24-hour period stretching from Saturday, January 23rd to Sunday, January 24th, SwampHacks 2016 will see 400 hackers flock to the University of Florida to make some incredible things.

Please review our official list of sponsorship packages below, and let us know if you're interested in becoming a SwampHacks sponsor.

We're excited to see what we can do together. Thank you for your time, and for doing your part to bring a hacker culture to the Gator Nation.

Regards,

The SwampHacks Team
